Director's Message

The field of cosmetology and dermatology has grown by leaps and bounds in the last decade and is ever evolving with new procedures , techniques and lasers being launched all the time .

It's said that the body is the temple of the mind and a healthy body harbours a evolving soul so in recent times the emphasis on looking right has become paramount and understandably so .

At cosmeasure we provide a complete solution to all our patients and clients whether it's that youthful look you are after or if ageing gracefully is your thing we provide customised solutions and expert advice at par with latest international standards .

When it comes to skin and hair people often get misled by unqualified personnel, hearsay remedies and gimmick marketing of beauty products and companies often causing excessive harm to their inherent skin and hair profile, we at Cosmeasure plan to change all this for our patients and clients by providing comprehensive solutions to all your skin and hair problems and conditions.

We never compromise on quality and have the latest and US FDA certified equipment only in our clinic like helios 3 nd yag hyperpigmentation and tattoo removal Laser from USA

Milesman permanent hair removal/reduction laser from USA

Duet Rf skin tightening and facial rejuvenation laser from Europe

We specialise in Botox , HA fillers, peels , non surgical thread lifts just to name a few.

Furthermore we have an array of expert and qualified specialists including plastic and cosmetic surgeons , dieticians and with a dermatologist who is internationally trained and qualified the patients /clients have the best of both the worlds since we are the only clinic to offer a dedicated department of plastic surgery and an attached operation theater in our set up

Dr. Amarendra Pandey

HELIOS 3 ND:YAG Q Switched (Pigment/Tattoo/Skin Whitening) Laser

The HELIOS 3 laser represents a new standard for the treatment of pigmented lesions. The HELIOS 3 is an Nd:YAG Q-Switch fractional laser.

What is an Nd:YAG Laser-

Nd:YAG is short for neodymium-doped yttrium garnet. Nd:YAG is a term used to differentiate the many types of lasers and specifically refers to the type of high-powered laser energy produced by the laser head that is delivered through the machine's handpiece. Usually Nd:YAG is delivered through a 1064nm or a 532nm wavelength, but can also produce transition wavelengths from 940nm-1440nm.

Lasers used in aesthetic treatments can target:

Chromophore (Melanin) Hemoglobin (Blood) Water

The HELIOS 3 II targets chromophore or melanin and is used extensively to target pigment and pigmented lesions in the skin. Since its debut, HELIOS 3 has set a new benchmark for all Q-Switch Nd:YAG lasers with its patented technologies.

HELIOS 3 USES & INDICATIONS

Utilizing this high-powered yet low-pain Nd:YAG Laser, the HELIOS 3 has been used to address:

Melasma, Tattoos Acquired, Bilateral Nevus of Ota-like Macules (ABNOM) Nevus of Ota

- Becker's Nevus • Lentigo • Freckles • Uneven Skin Tone
- Caf au Lait spots • Post-Inflammatory Hyperpigmentation of Skin (PIH)
- Sun Damage
- Onychomycosis (Nail Fungus)

HELIOS 3: FLAWLESS SKIN & REDUCED PAIN

HELIOS 3 is the unique solution for flawless skin. The 532nm mode can remove most epidermal skin lesions like freckles and sun spots. The 1064nm mode can treat deeper into the dermal layer and target discolorations like melasma and tattoos.

The Quasi Long pulse mode can target small vascular anomalies and redness. The **Carbon Peel** is great at rejuvenating the skin, reducing pores, and giving an all-around glow. The HELIOS III is a total skin care system that is a great addition to any practice.

Carbon Peel: The Carbon Peel is the process of applying a light coat of carbon over the skin and then essentially removing the carbon through a burst of light perfectly fired from the laser. When the carbon is blasted off the skin, dead skin cells, makeup residue, clogged pores, oil and blackheads are removed along with it.

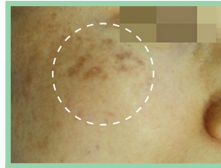

This leaves the skin radiant and glowing. This facial rejuvenation process is quick and painless & no downtime.

The benefits of Carbon Peels include **reduced pore size, even skin tone, less redness, reduction in oil production, reduction of fine lines and wrinkles from collagen stimulation and glowing skin from removal of the outer dry, flakey skin.**

Milesman Premium is the Gold Standard diode laser for hair removal

It has everything that a diode laser needs in order to achieve the best results in fewer sessions, it is comfortable and it is the most powerful on the market.

Uses of the Laser

The Milesman laser is used for PERMANENT HAIR REMOVAL whilst achieving very effective results within a few sessions and on all types of skin, including suntanned and dark skin.

Milesman is one of the first worldwide manufacturers of diode laser devices for hair removal and over the years it has developed to become one of the most effective, reliable and robust lasers on the market.

With a technology that has been proven for over 8 years and with thousands of satisfied patients, Milesman is a popular laser worldwide.

The Milesman diode laser is also indicated for other dermatological uses such as:

1. The treatment of vascular lesions, including angiomas, hemangiomas, telangiectasias, and other benign vascular lesions.
2. The treatment of benign pigmented lesions.
3. The treatment of pseudofolliculitis barbae.

DUET RF SKIN TIGHTENING/ SCAR REMOVAL

The **DUET RF** system provides 2 focused advanced radiofrequency technologies - Fractional RF skin resurfacing and Thermal RF deep dermal tissue tightening and remodeling.

DUET RF is based on the focused advanced radiofrequency technology. Fractional RF and Thermal RF systems can be used in combination or separately, and maximizes the effectiveness of treatment for various indications. A specially designed hand piece, with a choice of tips together with adjustable power control ensures the right treatment modality can be safely selected to match the various clinical indications.

Duet Fractional RF

Provides unique AFMR (Advanced Fractional Multi-Polarity Radiofrequency) technology, with the choice of three different density tips. The flexibility in treatment parameters means Duet can deliver mild sub-ablative skin resurfacing treatment all the way through to advance fractional epidermal ablative with deep dermal necrosis regions that promote more effective collagen remodeling, rivaling many traditional resurfacing treatments.

Advanced Multi-polarity Radiofrequency

Delivers precise RF energy while allowing the user the flexibility to select the density and RF intensity to match patient/client needs. Focused RF energy transfers heat to the deep dermal layer more efficiently than traditional laser treatment. A very minimal spot size through the epidermis allows to transfer and spread heat energy deeper into the dermis.

The energy permeates to a depth of 400 to 600 microns, allowing it to remain in the dermal layer longer and aid in collagen fiber regeneration.

NTTS (Non-pole Thermal Transpiration Structures) system is a technology that uniformly delivers RF thermal energy into both the dermis and subcutaneous tissue. NTTS provides a non-invasive treatment that immediately contracts collagen and fibrous septa while stimulating the formation of new collagen, which occurs over a 12-week period, providing a tighter more youthful-looking appearance.

Advanced mono-polar radiofrequency

Unlike other RF skin tightening devices, our NTTS system delivers the energy indirectly through a polyamide film, delivering the energy uniformly into the targeted tissue.

Application

- Double Chin • Facial Skin Tightening • Neck Tightening • Wrinkles • Scars • Enlarged Pores
- Hypertrophic Skin Texture • Pigmentation • Tightening • Lifting • Acne scars • Contouring

NON SURGICAL HA Filler

HA FILLER non-surgical filler is approved for injection into the mid to deep dermis (below the outer layer of skin) for the correction of moderate to severe facial wrinkles and folds, such as nasolabial folds (the creases running from the bottom of your nose to the corners of your mouth, also known as parentheses or smile lines).

HA FILLER is the first and only non-surgical filler FDA-approved to instantly smooth moderate to severe wrinkles around your nose and mouth for up to one year with optimal treatment.

WHY HA FILLER?

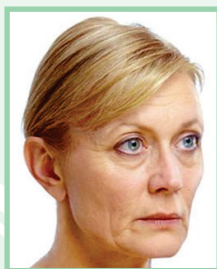

- Offers instant, natural-looking results for up to one year with optimal treatment
- Non-surgical. The injection can be performed in a brief office visit
- From the #1 selling family of fillers in the US
- Made with proprietary HYLACROSS™ technology
- Contains lidocaine for improved comfort during treatment

HA FILLER is a non-surgical filler your doctor uses to instantly smooth out moderate to severe lines along the sides of your nose and mouth. Natural looking results may last up to one year with optimal treatment. HA FILLER is made from proprietary HYLACROSS™ technology.

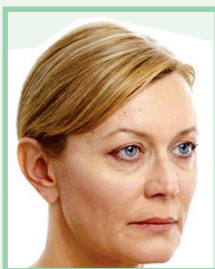

JUVÉDERM VOLUMA® XC is the first FDA-approved injectable gel specifically designed to instantly correct age-related volume loss in the cheek area for people over 21. It adds volume, creating contour and lift for up to two years with optimal treatment. JUVÉDERM VOLUMA® XC is manufactured using proprietary VYCROSS™ technology

APPROVED USES

HA FILLER injectable gel is for injection into areas of facial tissue where moderate to severe facial wrinkles and folds occur to temporarily add volume to the skin, especially around the nose and mouth.

THREAD LIFT : Non Surgical Face lift.

What is it :-

cosmetic procedure that lifts and realigns sagging tissue while adding definition to facial contours by using absorbable 'threads'. This procedure helps to reposition sagging cheeks, lift eyebrows, correct the marionette line, support the neck and improve facial features.

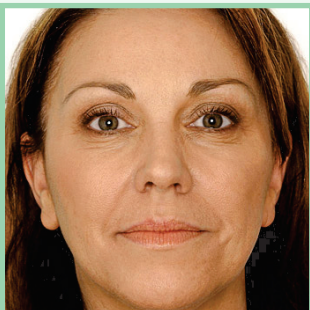

How do they work?

Due to the unique design of the specially designed soft barbs or cogs of the threads, the surrounding tissues act to hold the threads in place without the need for visible scars.

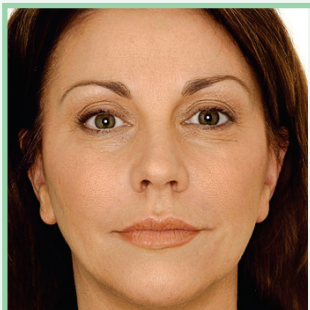

Threads are ideally suited for younger and middle aged patients whose skin tone has started to become lax with time or sun damage and who don't want or are unable to have a traditional face-lift. Patients are assessed individually for their suitability.

The procedure is safe and effective when performed by a medical practitioner who has been trained in these types of procedures. Threads can be used alone or to complement other facial surgery and non-invasive procedures such as IPL, Botox or injectable Dermal Fillers.

The procedure is also an excellent complement to other cosmetic treatments such as hyaluronic acid dermal fillers and Botulinum Toxin. The visible aesthetic benefits of a Silhouette Soft™ treatment normally last for a period of 12 to 18 months.

BOTOX® Cosmetic is the only approved treatment to temporarily improve the appearance of both moderate to severe frown lines between the brows and crow's feet lines in adults.

BOTOX® Cosmetic is the only approved treatment to temporarily improve the appearance of both moderate to severe frown lines between the brows and crow's feet lines in adults. A treatment experienced by millions of people

BOTOX® Cosmetic is the only approved treatment to temporarily improve the appearance of both moderate to severe frown lines between the brows and crow's feet lines in adults.

HOW DOES BOTOX® COSMETIC WORK?

For the frown lines area, your provider will administer 5 injections into muscles in your forehead—1 in the procerus muscle and 4 in the corrugator muscles.

Wrinkles result from a combination of many factors. It's not just about cellular changes that can occur over time, reduction of collagen, or damage caused by free radicals in the sun and the environment. When you frown or concentrate, the muscles between your brows contract, causing your skin to furrow and fold. And when you squint, the muscles around your eyes contract and cause crow's feet.

BOTOX® Cosmetic works beneath the skin's surface and targets the underlying muscle activity that causes frown lines and crow's feet.

You'll look like yourself—only with less noticeable frown lines and crow's feet

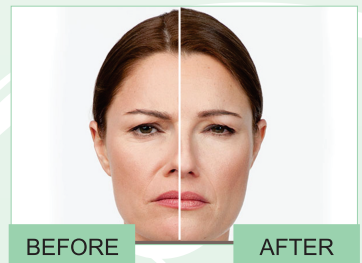

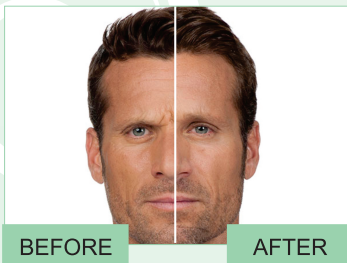

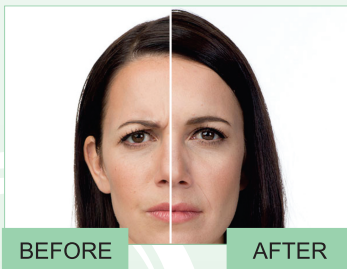

BOTOX® Cosmetic is a technique-sensitive treatment. You should not lose the ability to show expression when you are treated by someone who is licensed, trained, and a medical expert in facial anatomy.

Return to your daily routine

Treatment requires minimal downtime or recovery; it's often called a lunchtime procedure. You'll be able to go about your normal routine immediately after you leave your provider's office.

Indications

• Crow's feet • Fine lines • Wrinkles • Forehead lines • Glabellar lines • Chin Shaping
